Art Unit: 1732

1. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are submitted to be indefinite in that applicant recites forming an optical film yet it is not clear exactly what—ie, first film, first surface layer or second layer-- this film is.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Merrill et al –948 for reasons of record as set forth in the previous action.

3. Applicant's arguments filed July 20, 2006 have been fully considered but they are not persuasive. Applicant submits that Merrill et al –948 is devoid of any teaching to separate a facilitating layer. Such is not true, since the passage bridging columns 27 and 28 do indeed teach this, wherein the removal of an outer layer is disclosed. While the outer layer may not expressly be called a facilitating layer, it protects the optical blend material from being scratched or accumulating dust. Hence, it is a facilitating layer. See column 27, lines 17-22 where the definition of a facilitating layer is given, such a layer being either the core or outer layers. If it would have been obvious to have removed the outer layers, it certainly would have been obvious to have removed the core layer via delamination.

4.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
